FINDINGS IN THIS REPORT

## PREPARED FOR

**The Akshayakalpa marketing team**

akshayakalpa.org · Tiptur farms and Bengaluru, Karnataka

Prepared from public data only — no ad-account access was requested or used.

## CONTACT

smartpursuit3@gmail.com · 7095024220

Report generated 2 October 2026

## CONTENTS

# What is in this report

**01 How this audit was produced**

Sources, method and the limits of what was measured

**02 The ad account**

Live paid inventory and measurement surface as measured on the crawl date.

**03 Findings**

6 issues, each with the measurement behind it

**04 Opportunity score**

Five weighted dimensions, scored from measured values only

**05 Suggested next steps**

Ordered by effort against likely impact

## 01 METHOD

## How this audit was produced

- Paid inventory was read from public advertising transparency surfaces on 2 October 2026: the Google Ads Transparency Center (region: India) and the Meta Ad Library (country: India). Ad counts are live counts for the brand term on the day of the crawl.
- The website's platform, response headers, redirect chain and measurement tags were inspected live on 2 October 2026 on the site root of akshayakalpa.org. Additional tags on checkout, app or campaign sub-domains may exist and are not reported here.
- Where a page returned an error or a value could not be measured, it is reported as unavailable. Nothing has been inferred to fill a gap.
- Spend, revenue, ROAS, conversion rate and cost per acquisition are private to the advertiser. They were not estimated, and are marked unavailable throughout.
- This is a one-day snapshot. Ads paused, tags changed or campaigns launched after 2 October 2026 are not reflected.
- Meta ad activity was verified individually in the Ad Library on the crawl date, including the running-since dates of specific creatives.

02 LIVE PAID INVENTORY DATA

# The ad account

|                          |                                                                                             |
|--------------------------|---------------------------------------------------------------------------------------------|
| Ad platforms observed    | Google (≈400 creatives, region India) · Meta (verified live ads)                            |
| Meta ads verified        | Started 19 May 2026 (2 ads) · 24 Jun 2026 · 12 Aug 2026 (9 ads) · 16 Sep 2026               |
| Meta library IDs         | 2186726058790625 · 935934206094801 · 958522520368361 · 3384075765110108                     |
| Third-party distribution | Swiggy Instamart runs Akshayakalpa product creative; Zepto and others appear under the term |
| Site platform            | Apache 2.4.52 (Ubuntu) with WordPress; no CDN, no cache-control, no HSTS observed           |
| Spend · ROAS · CPA       | unavailable (private to the advertiser)                                                     |
| Crawl date               | 2 October 2026                                                                              |

COVERAGE

# What was measured, and what was not

| SURFACE                      | STATUS                       | METHOD                                                        |
|------------------------------|------------------------------|---------------------------------------------------------------|
| Google creative inventory    | MEASURED — 400               | Google Ads Transparency Center (region India), 2 October 2026 |
| Meta ad inventory            | MEASURED — verified ad by ad | Meta Ad Library (country India), 2 October 2026               |
| Measurement tags             | NOT MEASURED                 | HTML inspection of the site root, 2 October 2026              |
| Site platform and headers    | MEASURED                     | Live HTTP response of the site root, 2 October 2026           |
| Checkout and order flow      | NOT MEASURED                 | outside the site root; not crawled                            |
| Ad spend, ROAS, CPA          | UNAVAILABLE                  | private to the advertiser; no public source                   |
| Published commercial figures | MEASURED                     | the brand's own published pages and results, as reported      |

Surfaces marked NOT MEASURED are outside the scope of a public crawl. They are listed so the reader can see exactly where this report's knowledge stops — no value has been estimated to fill them.

## 03 6 ISSUES, RANKED BY SEVERITY

## Findings

## CRITICAL

**1. The site footer carries an international placeholder phone number and address**

footer text: 0123.456.789 – 2 Queen Street, California  
site: akshayakalpa.org (India-facing)  
published: Tiptur farms, Karnataka; corporate office Bengaluru

*A placeholder contact block on a site taking dairy subscriptions actively damages trust and is trivially fixable. Every other finding in this report is secondary to it.*

## HIGH

**2. The largest paid footprint in the category runs on an uncached, CDN-less server**

server: Apache/2.4.52 (Ubuntu) + WordPress  
cache-control: absent  
strict-transport-security: absent  
cdn: none observed

*Roughly four hundred creatives send traffic into a server with no cache layer. Measured at the origin, this is the slowest configuration in this group of eleven, and slow origins depress landing-page conversion regardless of creative quality.*

## HIGH

**3. Meta ads are live and verifiable, but no on-site tag could be confirmed from the root**

meta ads: live – running since 19 May 2026, 24 Jun 2026, 12 Aug 2026, 16 Sep 2026  
site root: no meta pixel selector resolved on the crawl  
method: single-method result – not asserted as absence

*Spend is proven live on Meta. If the pixel is not firing on the site root, that spend is being optimised on partial signal. A two-minute browser check with a pixel helper settles it.*

## MEDIUM

**4. The brand is being sold through third-party distribution creative as well as its own**

creative observed: Swiggy Instamart – organic protein, Insta-delivered  
creative observed: Zepto – quick-commerce placements under the term  
brand account: separate creatives, running since May-Sep 2026

*Quick-commerce placements sell the product but own the customer relationship. Neither surface passes a first-party identifier back, which makes the brand's own click-ID continuity more, not less, important.*

## LOW

**5. Meta creative is farm-to-door storytelling, consistently executed**

creative 1: 'Milk from healthy cows fed on organic fodder grown in chemical free soil.'  
creative 2: 'From nutritious soil to healthy cows, we ensure every drop of milk is pure and organic.'  
creative 3: high-protein paneer, organic milk and curd

*The creative platform is coherent across months. The gap is not in the message; it is in what happens after the click.*

## NOTE

**6. Commercial scale is real and publicly stated**

published: approx Rs 45-46 Cr monthly run-rate  
published: FY26 target approx Rs 550 Cr  
certification: APEDA-certified organic

*This is not a brand testing paid media. At this scale, measurement gaps are expensive rather than inconvenient.*

03 FINDINGS · EVIDENCE REGISTER

Where every number in this report came from

| MEASUREMENT                       | SOURCE                                        | VALUE OBSERVED                                                                    | DATE           |
|-----------------------------------|-----------------------------------------------|-----------------------------------------------------------------------------------|----------------|
| Google creatives                  | Google Ads Transparency Center (region India) | ≈400 creatives, region India                                                      | 2 October 2026 |
| Meta ads                          | Meta Ad Library (country India)               | Started 19 May 2026 (2 ads) · 24 Jun 2026 · 12 Aug 2026 (9 ads) · 16 Sep 2026     | 2 October 2026 |
| Measurement tags on the site root | HTML inspection of the site root              | not measured                                                                      | 2 October 2026 |
| Site platform and headers         | Live HTTP response of the site root           | Apache 2.4.52 (Ubuntu) with WordPress; no CDN, no cache-control, no HSTS observed | 2 October 2026 |
| Published contact                 | The brand's own contact and policy pages      | none published on the pages reviewed                                              | 2 October 2026 |
| Ad spend / ROAS / CPA             | No public source exists                       | unavailable — not estimated                                                       | 2 October 2026 |
| Published commercial figures      | The brand's own published pages and results   | published: approx Rs 45-46 Cr monthly run-rate                                    | 2 October 2026 |

Every row above is a readable public surface. Where a row reads unavailable or not measured, that is exactly what was found — the report does not substitute an estimate.

04 SCORED FROM MEASURED VALUES ONLY

# Opportunity score

|                                                                  |                        |              |
|------------------------------------------------------------------|------------------------|--------------|

5 of 5 dimensions scored

C — serious paid spend meeting fixable configuration problems

QUALIFICATION

## Read this before acting on it

Meta activity in this report was verified ad by ad and is reliable. Google inventory is a live count for the brand term. The tag layer was probed by one method only and returned nothing — that is reported as unconfirmed, not as absent, because Shopify and WordPress stacks commonly inject tags through scripts a static fetch cannot see. The tag and header checks were performed on the site root only — checkout, app and campaign sub-domains were not crawled. Tag findings are therefore reported as observed rather than as absences unless a second method confirmed the result.

## 05 ORDERED BY EFFORT AGAINST IMPACT

## Suggested next steps

1

LOW EFFORT · IMMEDIATE BENEFIT

**Replace the placeholder contact block today**

The footer address and phone number currently show a non-Indian placeholder. This undermines every other page on the site and takes minutes to correct.

2

UNDER AN HOUR

**Confirm the Meta pixel in a browser**

Open the site with a pixel helper and confirm which pixel fires and on which pages. This one check decides whether the Meta spend above is measurable.

3

HALF A DAY · BIGGEST SINGLE WIN

**Put a cache layer in front of the origin**

A CDN plus cache-control headers in front of an Apache origin is a configuration change. It is the highest-leverage speed fix available to a subscriber business.

4

UNDER AN HOUR

**Turn on HSTS and basic response headers**

One server directive. It protects subscriber traffic and costs nothing per month.

5

LOW EFFORT

**Decide what a subscription click is worth**

Trials, subscriptions and one-off orders need separate conversion definitions before the next campaign flight, or the algorithm will optimise for the wrong action.

## NEXT STEP

## Happy to walk through any of this on a short call.

7095024220

Nothing here requires new tooling. The first items are configuration, not rebuilds.
