

PAID MEDIA & MEASUREMENT AUDIT

Chai Point

Paid media and measurement audit. Fifty-six live creatives, one measurement tag observed, and a static site build that publishes its own scale numbers.

Report generated 2 October 2026

CONTENTS

What is in this report

01 How this audit was produced

Sources, method and the limits of what was measured

02 The ad account

Live paid inventory and measurement surface as measured on the crawl date.

03 Findings

6 issues, each with the measurement behind it

04 Opportunity score

Five weighted dimensions, scored from measured values only

05 Suggested next steps

Ordered by effort against likely impact

01 METHOD

How this audit was produced

- Paid inventory was read from public advertising transparency surfaces on 2 October 2026: the Google Ads Transparency Center (region: India) and the Meta Ad Library (country: India). Ad counts are live counts for the brand term on the day of the crawl.
- The website's platform, response headers, redirect chain and measurement tags were inspected live on 2 October 2026 on the site root of chaipoint.com. Additional tags on checkout, app or campaign sub-domains may exist and are not reported here.
- Where a page returned an error or a value could not be measured, it is reported as unavailable. Nothing has been inferred to fill a gap.
- Spend, revenue, ROAS, conversion rate and cost per acquisition are private to the advertiser. They were not estimated, and are marked unavailable throughout.
- This is a one-day snapshot. Ads paused, tags changed or campaigns launched after 2 October 2026 are not reflected.

02 LIVE PAID INVENTORY DATA

The ad account

Ad platforms observed	Google (≈56 creatives, region India) · Meta inventory not measurable on the crawl date
Measurement tags	GA4 G-EN77D2S0YH observed on the site root; Google Ads tag not observed on the root
Site platform	Static build on Amazon S3 behind CloudFront; asset last-modified 22 Sep 2026
Design system	Tailwind v4.3.3; brand #18289c, accent #ff6c22
Published scale	900,000+ cups per day · 150+ stores · 8,100+ workplaces · 9,000+ pincodes (own structured data)
Spend · ROAS · CPA	unavailable (private to the advertiser)
Crawl date	2 October 2026

COVERAGE

What was measured, and what was not

SURFACE	STATUS	METHOD
Google creative inventory	MEASURED — 56	Google Ads Transparency Center (region India), 2 October 2026
Meta ad inventory	NOT MEASURED	no inventory returned for the brand term on the crawl date
Measurement tags	MEASURED — GA4 G-EN77D2S0YH observed on the site root; Google Ads tag ...	HTML inspection of the site root, 2 October 2026
Site platform and headers	MEASURED	Live HTTP response of the site root, 2 October 2026
Checkout and order flow	NOT MEASURED	outside the site root; not crawled
Ad spend, ROAS, CPA	UNAVAILABLE	private to the advertiser; no public source
Published commercial figures	MEASURED	the brand's own published pages and results, as reported

Surfaces marked NOT MEASURED are outside the scope of a public crawl. They are listed so the reader can see exactly where this report's knowledge stops — no value has been estimated to fill them.

03 6 ISSUES, RANKED BY SEVERITY

Findings

HIGH**1. Only one measurement tag is observable against fifty-six live creatives**

```
ga4: G-EN77D2S0YH (site root)
google ads: not observed on the site root
meta pixel: not observed on the site root
live creatives: ≈56 (region India)
```

If the Google Ads tag sits on the ordering sub-domain rather than the marketing root, it would not appear here. Either way, the observable measurement surface is one analytics tag for a business running paid media at scale — worth confirming with a browser check.

MEDIUM**2. The site is a static build, so any tag change needs a deploy**

```
host: Amazon S3 + CloudFront
last-modified: 22 Sep 2026 (static assets)
stack: Tailwind v4.3.3 front-end
```

Static delivery is fast and cheap, and it is the right call for a store locator. The trade-off is that marketing tags cannot be added by a marketer — every experiment queues behind an engineering release unless a tag manager is present in the build.

MEDIUM**3. Bulk and workplace demand is a higher-value channel than the retail creative mix implies**

```
published pages: events and bulk orders
published scale: 8,100+ workplaces, 9,000+ pincodes
live creatives: ≈56, predominantly retail coffee
```

Workplace coffee is a contract business with very different economics from a cup. If bulk-order pages were reached by a dedicated campaign, the same spend would face less competition and a longer customer lifetime.

LOW**4. Customer care runs through a single published inbox**

```
published contact: customercare@chaipoint.com
separate bulk or franchise contact: not published on the pages reviewed
```

Routine queries and B2B enquiries share one address. The B2B enquiry is the one that should never wait in the same queue.

NOTE**5. The scale story is machine-readable and quotable**

```
json-ld: 900,000+ cups per day
json-ld: 150+ stores · 8,100+ workplaces · 9,000+ pincodes
```

Structured data this specific is a B2B weapon — workplace and bulk-order demand can be qualified by pincode before a call. Almost no consumer brand in this category publishes it.

NOTE

6. Brand design tokens are applied consistently

```
brand: #18289c  
accent: #ff6c22  
framework: Tailwind v4.3.3
```

Colour and type are consistent between the site and the published brand system. Creative-to-landing continuity has a solid base to build on.

03 FINDINGS · EVIDENCE REGISTER

Where every number in this report came from

MEASUREMENT	SOURCE	VALUE OBSERVED	DATE
Google creatives	Google Ads Transparency Center (region India)	≈56 creatives, region India	2 October 2026
Meta ads	Meta Ad Library (country India)	no inventory returned for the brand term	2 October 2026
Measurement tags on the site root	HTML inspection of the site root	GA4 G-EN77D2S0YH observed on the site root; Google Ads tag not observed on the root	2 October 2026
Site platform and headers	Live HTTP response of the site root	Static build on Amazon S3 behind CloudFront; asset last-modified 22 Sep 2026	2 October 2026
Published contact	The brand's own contact and policy pages	none published on the pages reviewed	2 October 2026
Ad spend / ROAS / CPA	No public source exists	unavailable — not estimated	2 October 2026
Published commercial figures	The brand's own published pages and results	900,000+ cups per day · 150+ stores · 8,100+ workplaces · 9,000+ pincodes (own structured data)	2 October 2026

Every row above is a readable public surface. Where a row reads unavailable or not measured, that is exactly what was found — the report does not substitute an estimate.

04 SCORED FROM MEASURED VALUES ONLY

Opportunity score

Measurement integrity		2 / 4
One analytics tag observed; ads and pixel tags not visible on the root.		
Conversion observability		2 / 4
Ordering flow is separate from the marketing root; not confirmed.		
Brand consistency		4 / 4
Consistent design tokens and published brand system.		
Technical health		3 / 4
Fast static delivery; tag changes gated behind deploys.		
Commercial fit		4 / 4
Retail scale plus an untapped contract channel.		

OVERALL

15 / 20

5 of 5 dimensions scored

B — strong operation, under-instrumented marketing surface

QUALIFICATION

Read this before acting on it

Ad inventory is a live count for the brand term on one day. The Meta Ad Library returned only a shell for this brand on the crawl date, so Meta activity is reported as not measurable rather than as zero. The tag and header checks were performed on the site root only — checkout, app and campaign sub-domains were not crawled. Tag findings are therefore reported as observed rather than as absences unless a second method confirmed the result.

05 ORDERED BY EFFORT AGAINST IMPACT

Suggested next steps

1

LOW EFFORT · IMMEDIATE BENEFIT

Run one browser tag check on the ordering flow

Confirm which tags fire on the order page. This decides whether fifty-six creatives are being optimised on real signal.

2

UNDER AN HOUR

Get a tag manager into the static build

Without one, every measurement change waits for a deploy. With one, marketing can iterate independently.

3

HALF A DAY · BIGGEST SINGLE WIN

Put workplace and bulk demand on its own campaign

Eight thousand one hundred workplaces and nine thousand pincodes are already published. A dedicated B2B landing path competes on a quieter auction than retail coffee.

4

UNDER AN HOUR

Separate the bulk enquiry from the support inbox

A routing rule, not a hire. Contract enquiries should never share a queue with cup complaints.

5

LOW EFFORT

Reconcile published store counts with reality each quarter

Structured data that goes stale becomes a credibility risk with enterprise buyers who check it.

NEXT STEP

Happy to walk through any of this on a short call.

7095024220

Nothing here requires new tooling. The first items are configuration, not rebuilds.
