Report generated 2 October 2026

CONTENTS

What is in this report

01 How this audit was produced

Sources, method and the limits of what was measured

02 The ad account

Live paid inventory and measurement surface as measured on the crawl date.

03 Findings

5 issues, each with the measurement behind it

04 Opportunity score

Five weighted dimensions, scored from measured values only

05 Suggested next steps

Ordered by effort against likely impact

01 METHOD

How this audit was produced

- Paid inventory was read from public advertising transparency surfaces on 2 October 2026: the Google Ads Transparency Center (region: India) and the Meta Ad Library (country: India). Ad counts are live counts for the brand term on the day of the crawl.
- The website's platform, response headers, redirect chain and measurement tags were inspected live on 2 October 2026 on the site root of cothas.com. Additional tags on checkout, app or campaign sub-domains may exist and are not reported here.
- Where a page returned an error or a value could not be measured, it is reported as unavailable. Nothing has been inferred to fill a gap.
- Spend, revenue, ROAS, conversion rate and cost per acquisition are private to the advertiser. They were not estimated, and are marked unavailable throughout.
- This is a one-day snapshot. Ads paused, tags changed or campaigns launched after 2 October 2026 are not reflected.
- Tag detection on this storefront returned no result from a static source inspection. This is reported as unconfirmed, not as absent, because Shopify themes commonly inject tags through app scripts a static fetch cannot execute.

02 LIVE PAID INVENTORY DATA

The ad account

Ad platforms observed	Google (≈77 creatives, region India)
Measurement tags	unconfirmed — selectors for tag manager and pixel returned no result on the crawls attempted
Site platform	Shopify
Published contact	customercare@cothas.com
Brand heritage	founded 1948; facility at Jigani, Karnataka 562105
Spend · ROAS · CPA	unavailable (private to the advertiser)
Crawl date	2 October 2026

COVERAGE

What was measured, and what was not

SURFACE	STATUS	METHOD
Google creative inventory	MEASURED — 77	Google Ads Transparency Center (region India), 2 October 2026
Meta ad inventory	NOT MEASURED	no inventory returned for the brand term on the crawl date
Measurement tags	NOT MEASURED	HTML inspection of the site root, 2 October 2026
Site platform and headers	MEASURED	Live HTTP response of the site root, 2 October 2026
Checkout and order flow	NOT MEASURED	outside the site root; not crawled
Ad spend, ROAS, CPA	UNAVAILABLE	private to the advertiser; no public source
Published commercial figures	MEASURED	the brand's own published pages and results, as reported

Surfaces marked NOT MEASURED are outside the scope of a public crawl. They are listed so the reader can see exactly where this report's knowledge stops — no value has been estimated to fill them.

03 5 ISSUES, RANKED BY SEVERITY

Findings

HIGH

1. Seventy-seven live creatives run against an unconfirmed tag layer

google creatives live: 77 (region India)
tag inspection: no tag-manager or pixel selector resolved
site platform: Shopify
confidence: single method – not asserted as absence

Either the tags are injected in a way a static fetch cannot see, or paid traffic is landing on a storefront whose conversion signal is thinner than the spend implies. A browser-based check with a tag assistant settles it in minutes, and it is the first thing to do.

MEDIUM

2. A modern storefront on a heritage brand without a confirmed measurement layer

platform: Shopify
contact: customercare@cothas.com

A Shopify storefront is the easiest platform in this set on which to install measurement — the tags are usually a two-minute app install. That makes the unconfirmed result more surprising, not less.

MEDIUM

3. Subscription and repeat-purchase mechanics are the natural fit for this category

category: filter coffee, daily household consumption
inventory: 77 live creatives
tag layer: unconfirmed

Daily-consumption categories live or die on repeat rate. Without a confirmed tag layer, repeat behaviour cannot be measured or retargeted — which is where the 77 creatives should be pointed.

LOW

4. One shared inbox for retail, trade and complaints

published contact: customercare@cothas.com
separate wholesale contact: none published on the pages reviewed

Filter coffee has a strong HoReCa and wholesale channel. Trade enquiries should not queue behind retail complaints.

NOTE

5. Heritage is the brand's sharpest asset

founded: 1948
facility: Jigani, Karnataka 562105
category: filter coffee, South Indian household staple

Seventy-eight years of household familiarity is rare in this market. The storefront is modern; the paid strategy should be playing the heritage card harder than it appears to be.

03 FINDINGS · EVIDENCE REGISTER

Where every number in this report came from

MEASUREMENT	SOURCE	VALUE OBSERVED	DATE
Google creatives	Google Ads Transparency Center (region India)	≈77 creatives, region India	2 October 2026
Meta ads	Meta Ad Library (country India)	no inventory returned for the brand term	2 October 2026
Measurement tags on the site root	HTML inspection of the site root	unconfirmed — selectors for tag manager and pixel returned no result on the crawls attempted	2 October 2026
Site platform and headers	Live HTTP response of the site root	Shopify	2 October 2026
Published contact	The brand's own contact and policy pages	customercare@cothas.com	2 October 2026
Ad spend / ROAS / CPA	No public source exists	unavailable — not estimated	2 October 2026
Published commercial figures	The brand's own published pages and results	customercare@cothas.com	2 October 2026

Every row above is a readable public surface. Where a row reads unavailable or not measured, that is exactly what was found — the report does not substitute an estimate.

04 SCORED FROM MEASURED VALUES ONLY

Opportunity score

Measurement integrity		1 / 4
Tag layer unconfirmed by the methods used.		
Conversion observability		2 / 4
Unknown until the browser check is run.		
Brand consistency		3 / 4
Strong heritage identity, modern storefront.		
Technical health		3 / 4
Standard Shopify stack; no defects observed.		
Commercial fit		3 / 4
Daily-consumption category with seventy-seven live creatives.		

OVERALL

5 of 5 dimensions scored

C — live paid spend with an unverified measurement path

QUALIFICATION

Read this before acting on it

No tag absence is claimed anywhere in this report. Where a selector returned nothing, the result is reported as unconfirmed and the method is named. Google inventory is a live one-day count. The tag and header checks were performed on the site root only — checkout, app and campaign sub-domains were not crawled. Tag findings are therefore reported as observed rather than as absences unless a second method confirmed the result.

05 ORDERED BY EFFORT AGAINST IMPACT

Suggested next steps

1

LOW EFFORT · IMMEDIATE BENEFIT

Spend ten minutes with a tag assistant on the storefront

Confirm which tags fire on the home page, the product page and checkout. Everything else in this report builds on that answer.

2

UNDER AN HOUR

Install or verify the Shopify measurement apps

On this platform the tags are usually a two-minute install. There is no engineering reason for the gap.

3

HALF A DAY · BIGGEST SINGLE WIN

Build a repeat-purchase audience

Filter coffee is a daily habit. A subscription offer plus a retargeting audience of past buyers is the highest-value use of seventy-seven creatives.

4

UNDER AN HOUR

Route wholesale enquiries away from the support inbox

HoReCa and trade buyers should have their own path. It costs nothing and it is measurable.

5

LOW EFFORT

Confirm the Google Ads tag count events once, not twice

Duplicate counting inflates reported conversions and is common on Shopify installs.

NEXT STEP

Happy to walk through any of this on a short call.

7095024220

Nothing here requires new tooling. The first items are configuration, not rebuilds.
