3 LEAKS WE FOUND (live-verified)

LEAK 1: ~400 creatives without a ranking system At this volume spend thins across assets and audiences. If the top 10 performers cannot be named, the other ~390 are paying for lessons already learned.
LEAK 2: The site undermines a farm-to-door premium brand Live footer template text - '0123.456.789 - 2 Queen Street, California, USA' - sits on the pages paid traffic lands on. Small fix, direct trust cost while live.
LEAK 3: No B2B or gifting path published Cafés, cloud kitchens, hotels, corporate pantry and gifting buyers have nowhere to go: only a support address is published, so that demand never enters the funnel.

3 QUICK WINS (14-DAY ROADMAP) → FIX LEAKS + LOWER CPA

DAY 1-4: Clean the funnel before feeding it more spend Remove placeholder artifacts, publish a real Bengaluru contact block, and rebuild the three highest-spend landing pages around the 24-36 hour freshness proof with subscription as the primary CTA.
DAY 5-10: Rank the creative inventory Instrument all ~400 creatives, rank by CPA, kill the bottom third, and rebuild around 3 repeatable formats (proof film, farmer story, offer card) from one weekly shoot.
DAY 11-14: Open the B2B and gifting lines Enquiry paths for HoReCa / corporate pantry / gifting with a form, case study and price-on-request flow - plus a small always-on campaign against them.

EXPECTED ROI IN 14 DAYS

METRIC	BEFORE (LIVE)	AFTER 14 DAYS	INDUSTRY BENCHMARK
Creative inventory	~400 creatives, ranking unknown	Top 10 known, bottom third cut	Same spend, better unit economics (media practice)
Landing trust	Placeholder footer live	Clean, proof-led pages	Higher conversion, protected premium (CRO benchmark)
B2B / gifting	No enquiry path published	Form + case study + always-on campaign	New revenue line at low incremental spend (B2B benchmark)

Benchmarks are published industry ranges (e.g. e-commerce landing-page lift), labelled as such - no client results are invented. Your numbers are the live-verified values in the BEFORE column.
